PART III REASONS FOR ALLOWANCE

1. This application has been examined. Claims 1 and 19-26 are being allowed over the prior art of record. Prosecution on the merits is closed in this application.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record teaches different ways of detecting dust or foreign matter on the surface of a white reference member (see 2003/0016398 and 5,932,948). However the prior art of record fails to teach, or suggest the claimed limitations of (in combination with all other features in the claims), an image reading apparatus having the image read device generating white reference image data when the image reading device images the reference surface of the white reference member and generates original image data when the image reading device images an original document on the original document glass; **a random noise suppressing device that suppresses random noise components in the white reference image data; a detecting device that detects a location of one or more abnormalities in the white reference image data in which random noise components have been suppressed by the random noise suppressing device, wherein each abnormality corresponds with the presence of foreign matter on the reference surface of the white reference member; and an abnormality identification device that generates an abnormality signal indicative of the detected location of the abnormality,** as recited by the independent claims

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee, and to avoid processing delays, should preferably accompany the Issue Fee. such submissions should be clearly labeled "comments on statement of Reasons for Allowance".

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Soeda (2003/0016398) teaches a reference white plate density data adjusting image reading and forming apparatus.

Shimada et al. (5,982,948) teaches an image reader having a white plate.
